

Our range of saddles for Polysewer and Ridgisewer structured wall plastic pipes allows the leak-tight and secure connection of 160mm EN1401-1 underground drainage pipe.

They are suitable for both new installations and for post-fix connection into existing pipelines.

Key benefits

- Designed specifically to seal onto structured wall plastic sewer pipes
- Durable watertight joint tested to EN 1277:1996
- Limits protrusion of lateral pipe into the main drain or sewer
- Can be connected to smaller pipes and to laterals of different materials using adaptors
- Environmentally friendly as all elements are recyclable
- Elastomeric seal ensures reliable flexible watertight joint between lateral and main drain/sewer
- Reduces disruption and risk of damage to the sewer as there is no need to fully excavate around the pipe
- Will withstand 0.5 bar internal pressure

Applications

Sewer Saddles are suitable for both new installations and for post-fix connection into exiting sewer pipelines.

For sizes 300–600mm
